

BSC-5000 Base Station Console

Introducing the newest 'Accessory' for the Vertex Standard lineup. The BSC-5000 Base Station Console. For our dealers who were asking for a Base Station that was more than a radio sitting on top of a power supply, we developed the integrated component required to allow them to offer a base station to meet their customer's needs.

The BSC-5000 was specifically designed to incorporate the VX-4000, VX-5500 or VX-6000 mobiles*. This gives our dealer the flexibility to provide a base station to the customer's specific requirements:

What frequency and power level do **you** need?

Lowband	70 W	120 W
VHF	50 W	110 W
UHF	45 W	100 W

Features:

- ◇ Connections for DC backup
- ◇ Build to suit construction
- ◇ Built in power switching from AC to DC upon AC power failure
- ◇ Built in Date / Time clock
- ◇ Large front mounted speaker for clear and loud audio
- ◇ Internal mic jack converter for use of the MD-11 desk mic
- ◇ Built in 30 Amp DC supply

* The Dealer must purchase and install the appropriate mobile.
